

GazSurf - provides wide range of reliable compressor units, spare parts and consumables supply in Ukraine, Russia and Kazakhstan.

We offer the competitive service support and the best engineering solutions for compressor equipment in the CIS.

Compressor Equipment Supply

Commissioning & Start Up Works

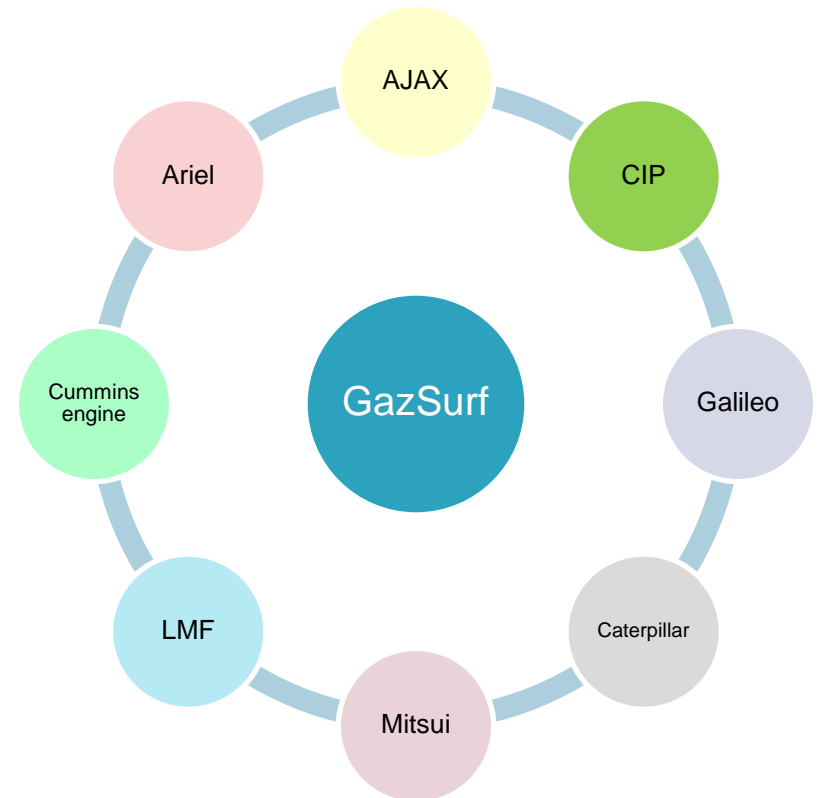

Aftermarket Support & Repair Service

Spare parts & Consumables Supply

We offer full range of start up and maintenance works of the best compressor equipment manufacturers

Our qualified engineers are highly experienced in rendering compressor equipment maintenance and repairing works and providing consultancy services.

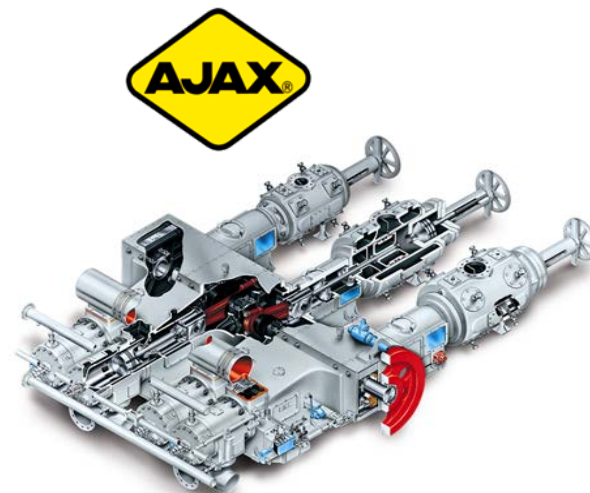

Our engineers successfully completed trainings on **Ajax** and **Ariel** compressors technical maintenance and obtained the Certificates of Merit in Ajax Workshop in the Cameron Compression Systems and the Ariel Corporation.

AJAX integral engine compressors supply is one of our main areas of activity. At the same time we offer full range of engineering, maintenance & service works of AJAX compressors as well as spare parts and consumables supply.

AJAX integral engine compressors are gas compressors with built-in natural gas engine.

Their compact design and reliable gas engine drive make them ideal for field installation.

GazSurf launched in 2012, successfully gathering experience and best practices of the leading oil & gas companies, cooperates with the best world compressor equipments manufacturers and actively seeks to develop business partnership with the new suppliers.
